

NASDAQ: GNPX

CORPORATE FACT SHEET

Genprex, Inc. is a clinical-stage gene therapy company focused on developing life-changing therapies for patients with cancer and diabetes.

Genprex's technologies are designed to administer disease-fighting genes to provide new therapies for large patient populations with cancer and diabetes who currently have limited treatment options.

Genprex works with world-class institutions and collaborators to develop drug candidates to further its pipeline of gene therapies in order to provide novel treatment approaches.

The Company's lead product candidate, Reqorsa® Gene Therapy, is being evaluated as a treatment for non-small cell lung cancer (NSCLC) and small cell lung cancer (SCLC).

Genprex's diabetes gene therapy approach is comprised of a novel infusion process that uses an AAV vector to deliver Pdx1 and MafA genes to the pancreas.

GENERAL COMPANY INFORMATION

- Founded in 2009: Publicly traded company (NASDAQ: GNPX) since 2018
- Headquartered in Austin, Texas
- Team of executives and advisors with broad business experience in the biotech and pharmaceutical industries and research and clinical experience at preeminent medical and academic institutions around the world
- Advancing novel gene therapies for patients afflicted with cancer or diabetes

ONCOLOGY

- Non-viral gene therapy platform
- Novel approach using systemic gene therapy to replace tumor suppressor genes for cancer in humans
- Two FDA Fast Track Designations; One FDA Orphan Drug Designation and two lung cancer trials
- Clinical achievement in Ph 1 and Ph 2 studies

DIABETES

- Addressing both Type 1 and Type 2 diabetes with AAV gene therapy
- Novel infusion process delivers gene to pancreas
- Demonstrated ability to stabilize glucose levels and reduce insulin requirements shown in Non-Human Primate studies
- Poised for FDA guidance in 1H 2025
